**Tech Field Day**

**What is Tech Field Day?**

Field Day events are live streamed, interactive events bringing together innovative enterprise IT companies and global tech influencers to share, learn, and interact in focused technical sessions.

We organize, record, and stream live video of interactive sessions where sponsors present and discuss their products and technologies with expert independent technical influencers.

Watch Stephen Foskett’s intro video

**Benefits of presenting at Field Day events:**

- Live delegate interaction creates credible and memorable presentations
- Expert feedback on technology and product positioning
- Professional event management and video production
- Joint promotion of videos and coverage through our social media channels

"Tech Field Day events are always a great way to show off our newest products and features. They gave us a huge online bump in terms of awareness, while providing invaluable feedback from industry experts to our product team and engineers."

**What our presenting companies have to say:**
